

3rd annual Monte Carlo Anti-Aging Conference & Exposition

The Application of Anti-Aging Medicine

The Monte Carlo Anti-Aging Conference is Europe's premier Anti-Aging meeting and it attracts the world's leading physicians, researchers and scientists who are applying anti-aging medicine to slow biological aging, prevent aging disease and improve longevity. Due to its excellent scientific programme the Conference received 12 Class 1 CME credits from the American Medical Association.

...Conference highlights... **The skin aging process and innovative therapies** ...Conference highlights...

As exhibitor at the 3rd Int. Anti-Aging Conference Energy Synopharm, Germany is proud to announce the introduction of an innovative skin care line based on the most advanced knowledge of the dermatological and free radical research.

The scientific background of our new formulations against the skin aging process are thoroughly discussed during the Conference in the lecture

The impact of the free radical theory of aging on skin structures and potential therapies
given by Dr. John G. Ionescu, Professor at Univ. Washington D.C. → on Sept. 6 at 5.45 p.m.

and recorded in the Conference Syllabus.

The immediate effects of the Energy products (see next page) on the skin texture are subject of repeated live demonstrations for Conference participants at our booth by means of individual skin typing, energy transfer reactions and wrinkle assessments.

As one of our most enthusiastic fans the host of the Conference, her Highness Angela Princess of Hohenzollern, expressed her admiration and gratitude for the unmatched quality of our products some of which the Princess is using herself.

anti-aging research. Highlights of the conference included Dr. Mark Babizhayev's report on his breakthrough discovery of a non-surgical cure for cataracts, and Michael Fossel's research into telomeres and human life extension trials. There were also lectures by the world's authority on melatonin; the world's authority on chelation; France's expert in DHEA research and application; Germany's expert in treating rare and general skin conditions; and the UK's premier researcher in cell apoptosis. Read more about the prestigious speakers and their presentations on the latest techniques of anti-aging medicine to slow biological aging, prevent age-related disease and improve quality of life on page 3 of this newsletter.

Heather Bird and her Company, HB Health, Lead Health Care Revolution in Europe

Being a co-sponsor and co-organizer of the 3rd Annual Monte Carlo Anti-Aging Conference recently held in Monaco is in keeping with the HB Health mission to promote optimal health, preventative medicine, healthy ageing and a higher quality of life for as many people as possible by facilitating the dissemination of knowledge and the latest advances in medical science, biotechnology and health care.

Heather Bird, President & CEO of HB Health, moderates a Q & A session with speakers.

His Highness Prince Albert of Monaco Honors Leading Experts in Anti-Aging Medicine at Monte Carlo Anti-Aging Conference

From left to right: Mark Babizhayev, Ph.D. (Speaker), Phil Micans, PharmB (Chairman), Imre Zs.-Nagy, MD (Speaker), Michael Fossel, MD, Ph.D. (Speaker), Marios Kyriazis, MD (Speaker), Jennifer Krup, MD (Speaker), Heather Bird, MBA (Moderator), Gary Gordon, MD (Speaker), HSH Prince Albert of Monaco, John Ionescu, Ph.D. (Speaker), Jim Reed, B.Sc. (Director), Michael Perring, MA (Speaker), and Walter Pierpaoli, MD (Speaker).

A very special guest at the Monte Carlo Conference Friday night Gala Party was His Serene Highness, Prince Albert of Monaco. Monsignor Prince Albert was very interested in learning and hearing more about Anti-Aging Medicine. As an athlete and a follower of sports medicine, Prince Albert had a clear understanding of the concepts and goals of Preventative/Anti-Aging Medicine and asked many pertinent questions.
